Author
Stefan Heule (Dim3nsioneer), dimensioneer@gmx.ch   V15.01+

Installation

(for Cura)

1. Close Cura if opened
2. *Copy 'SelectExtrude.py' to the plugin folder of the Cura installation*
   e.g on Windows: C:\Program Files (x86)\Cura_15.01\plugins
3. Start Cura

Description

General purpose: Selects the extruder for a single extruder print on a multi extruder machine.

Screenshot of SelectExtruder 15.01

Version restrictions

The status bar feature only works on Cura versions from 14.12.

Input description (V15.01)

Extruder to be used Specifies the number of the extruder to be used for the single extruder print (first extruder: 0, second extruder: 1, …)

Remarks / additional features

Extruder-specific changes in Cura or in any plugin executed **before the SelectExtruder** plugin should be applied to the **first extruder**.
Extruder-specific changes in any plugin executed **after the SelectExtruder** plugin should be applied to the **extruder specified in the Select Extruder plugin**.
